## **Collection title:** Florida Museum of Natural History Vertebrate Paleontology Archives

### **Repository**

Florida Museum of Natural History (FLMNH), Vertebrate Paleontology (VP) Division

### **Initial Creator**

FLMNH VP, Bruce J. MacFadden

### **Dates of Archival Collection Materials**

1904-2024

Note: These archives mostly contain materials from the 2<sup>nd</sup> half of the 20<sup>th</sup> century through the first quarter of the 21<sup>st</sup> century. It should be noted, however, that during the latter part of the first quarter of the 21<sup>st</sup> century, original physical archives (e.g., photos, slides, and documents) were replaced, either partially or entirely, with primary digital resources.

### **Number of Series and Files**

9 Series, containing a total of, at last update, 41 Files/Boxes and 1,006 Items

### **Language of Materials**

English

### **Abstract of Archive Collection**

This archive contains curated and combined physical and some digital records and materials that have mostly accumulated over the past ca. 70 years since the VP Division started at the FLMNH.

## **Administrative History**

The Division of Vertebrate Paleontology has been, and continues to be, an active research, collections, training, education, and outreach program within the FLMNH (Department of Natural History). More relevant information about VP can be found at: <https://www.floridamuseum.ufl.edu/vertpaleo/>

## **Scope, Content, and Purpose of the Collection**

This archive contains numerous different forms of physical and digital materials, including field notes, general files, compact disks, 2 x 2 slides, photographs, and related materials as enumerated in the series below.

The VP collections are a major national and international natural history resource of more than one million specimens, about 60% of which have been digitally catalogued in Specify. By various metrics, including the size of collections and research done on it, the VP collections rank within the top 5 to 6 of their kind (for university-based natural history museums within the US). For a history of this program see:

MacFadden, B. J. 2017. Vertebrate paleontology at the Florida Museum of Natural History, University of Florida: the past 60 years of research and education. 3:51–87. [Download Vol. 55, No. 3](#)

The rationale and purposes of the VP Archives are to:

1. Provide archival materials that support, enhance, and clarify the research capabilities of the VP collections and specimens contained therein.
2. Document persons who have worked on and/or contributed to the VP collections.

The purpose of this collection is to curate (cull, conserve, aggregate, and document) all original, mostly physical, VP archival materials. We realize that the next step would be to digitize these resources. This digitization process, however, is outside the intended scope of the current effort.

## **Acknowledgements**

This archive was created, assembled, and curated from materials and resources that have been aggregated over the years by various individuals associated with the VP division and its collections. The original creation of the VP archives was led initiated and directed by Bruce J. MacFadden in 2024, just prior to his retirement. Alexa Neilson, UF undergraduate student assistant, deserves much of the credit for her careful attention to detail while organizing and documenting the archives. Dr. MacFadden also acknowledges the numerous people who have helped in the creation of the VP archives, including Rachel Narducci (VP Collection Manager), Charles O'Connor (volunteer), Jeff Gage (FLMNH Photography), and Kate Smith and Sarah Coates (UF libraries). We also hereby thank the many participants and contributors to the VP program that have chronicled their research and collections activities through their field notes, photographs, and other relevant archival materials.

### **Location**

Florida Museum of Natural History, Vertebrate Paleontology (VP) Division, Dickinson Hall, University of Florida

### **Access**

This collection is open to researchers and others interested in learning more about materials and documentation assembled in support of the VP Collection and the people who worked in, or contributed to, the VP Collection.

## Location of Series Within Archives

The filing cabinet containing the majority of the Vertebrate Paleontology Archives is organized as follows:

<i>Filing Cabinet</i>	
<i>Drawer 1</i>	
<i>Drawer 2</i>	<b>Series 1 (News Bulletins)</b>
<i>Drawer 3</i>	<b>Series 2 (Field Notebooks)</b> <b>Series 3 (CDs, DVDs, etc.)</b>
<i>Drawer 4</i>	<b>Series 5 (Isotope Files)</b> <b>Series 7 (Photographs)</b> <b>Series 8 (General Files)</b> <b>Series 9 (Permissions Files)</b>
<i>Drawer 5</i>	<b>Series 5 (Isotope Box)</b> <b>Series 6 (2x2 Photo Slides)</b> <b>Series 7 (Photos in Albums)</b> <b>Series 9 (Permissions Files)</b>

**Series 4 (Maps)** are contained in the Map Cabinet in the Vertebrate Paleontology Collections.

A portion of **Series 3 (CDs, DVDs, etc.)** are VHS tapes utilized in FLMNH Exhibits. These are listed in the Appendix of this document and archived in the Powell Hall collections, care of the director's office Photography and Imaging team.

## Archive Inventory

### Series 1: News Bulletins

Including *Society of Vertebrate Paleontology* (1941-2008), this series contains an almost complete (only missing #182-185 [4 issues]) run of periodic (mostly quarterly) newsletters published by the SVP. It documents news of research and museum and member activities. The audience for the SVP Newsletter was primarily the members of the society. Although partially duplicated by the U.S. National Archives, this series may be a unique, nearly complete set of this newsletter. It therefore documents an informal history of the society. Additional news bulletin collections of *The Plaster Jacket* (1966-1978) and *Pony Express* (1992-2003) are also archived here.

## Series 7: Photographs

This series contains photographs pertaining primarily to the people, fossil sites, and history of the Division of Vertebrate Paleontology. Many have been archived into files, though some are still contained in their original photo albums to maintain context. Further, some photos, when indicated, are stored with their original context or correspondence in **Series 8: General Files**, and are referenced here to assist with locating them.

## APPENDIX

### List of VHS recordings

In July 2024, Dr. MacFadden reviewed the following list of archived videos. From the titles, at least 26 (highlighted in yellow) may have content that supports or further explains aspects of the FLMNH vertebrate paleontology (VP) collections and research programs and participants. Other videos in this list may also pertain to aspects of the VP collections and research, but these are not apparent from their titles.

The archived videos can be accessed at Powell Hall, care of the Director's Office Photography and Imaging team.
